Herndon-Based MobiApps Holdings Acquired By Digi International

ORBCOMM Inc. (Nasdaq: ORBC), a global satellite data communications company focused on providing Machine to Machine (M2M) solutions, announced that Digi International® Inc. (NASDAQ: DGII) has entered the market for satellite Subscriber Communicators for the ORBCOMM network with its recent purchase of MobiApps Holdings Private Limited (MobiApps). MobiApps is a developer of M2M communications technology, focusing on ORBCOMM satellite, cellular and hybrid satellite/cellular solutions.

"We are very proud to welcome Digi as a manufacturer of Subscriber Communicators for the ORBCOMM global M2M network," says Marc Eisenberg, CEO of ORBCOMM. "We continue to be impressed by the innovation that MobiApps brings to Subscriber Communicator design. Now, under the Digi umbrella, that technology can reach a larger market. As a leader in M2M, Digi brings considerable expertise in product design and distribution, with a strong presence throughout the world." "Our wireless M2M customers are increasingly asking for satellite as a communications option to complete their coverage model," said **Joe Dunsmore**, Chairman, President, and CEO of Digi. "We're looking forward to moving MobiApps products into Digi's strong global sales and distribution network. We believe that satellite M2M will be a high growth opportunity for the foreseeable future."

The acquisition of MobiApps by Digi will result in Satellite Communicators that are especially suited to applications that cross country and continental boundaries, providing connectivity in very remote locations, and providing mission critical wireless backup solutions when cellular coverage is insufficient. Digi will continue to produce the MobiApps M10, M100, M200 Subscriber Communicator models, as well as the custom designed and patented mixed signal application specific integrated circuit (ASIC), that it supplies to other module manufacturers.

About ORBCOMM Inc.

ORBCOMM is a leading global satellite data communications company, focused on Machine-to-Machine (M2M) communications. Its customers include Caterpillar Inc., Doosan Infracore America, General Electric, Hitachi Construction Machinery, Hyundai Heavy Industries, Komatsu Ltd., Manitowoc Crane Companies, Inc., and Volvo Construction Equipment among other industry leaders. By means of a global network of low-earth orbit (LEO) satellites and accompanying ground infrastructure, ORBCOMM's low-cost and reliable two-way data communications products and services track, monitor and control mobile and fixed assets in four core markets: commercial transportation; heavy equipment; industrial fixed assets; and marine/homeland security. The Company's products are installed on trucks, containers, marine vessels, locomotives, backhoes, pipelines, oil wells, utility meters, storage tanks and other assets. ORBCOMM is headquartered in Fort Lee, New Jersey and has a network control center in Dulles, Virginia. For more information, visit www.orbcomm.com.

About Digi International

Digi International is making wireless M2M easy by developing reliable products and solutions to connect and securely manage local or remote electronic devices over the network or via the Web. Digi offers the highest levels of performance, flexibility and quality, and markets its products through a global network of distributors and resellers, systems integrators and original equipment manufacturers (OEMs).
