[landline service](#) is interrupted.

“We deploy the Digi solution to our stores in the event of a natural disaster, such as a hurricane, flooding or some other local event, that knocks out landline connections. We need a reliable backup solution, just in case, to ensure we can continue operations and serve our customers,” said Guy Cummins, [project manager](#), Verizon Wireless Information Technology. “The Digi product is pretty much plug and play. Ease of deployment is outstanding.”

Digi’s cellular routers use Verizon Wireless’ EVDO Rev A network to create secure Wireless WAN (WWAN)

Digi Connect WAN 3G wireless gateways chosen for ease of deployment, ease of configuration

tweet

MINNETONKA, Minn. (May 11, 2009) – Digi International (NASDAQ: DGII) today announced that Verizon Wireless is using Digi Connect WAN 3G high-speed [cellular](#) routers to provide wireless broadband backup connectivity at 300 [Verizon Wireless](#) Communications Stores in the U.S. The router provides backup to a high-speed connection over the Verizon Wireless network when

connections to remote assets for real-time two-way communications. Through its open development program, Verizon Wireless has certified multiple Digi products to run on the Verizon Wireless network. Verizon Wireless' open development program is driven by the company's desire to encourage innovation, give businesses new wireless choices, and quickly address opportunities to expand [the wireless](#) market.
