

## Digi International's Digi Connect WAN 3G IA

### RUGGED ROUTER

The Digi Connect WAN 3G IA is a third-generation (3G) wireless WAN router for secure primary and backup connectivity to remote devices in severe environments. It supports industrial protocols and features high-speed 3G connectivity. The router provides support for both HSDPA (GSM) and EVDO (CDMA) connections and features Class I, Div. 2, industrial certification. It also includes Modbus TCP support for easy connectivity to programmable logic controllers, remote terminal units and other industrial devices.
