Digi International introduced the rugged ConnectPort X3 H programmable cellular gateway for monitoring remote assets in harsh environments. The Digi ConnectPort X3 H features a NEMA 4X/IP66 enclosure to protect the gateway from water, dust and dirt. The ConnectPort X3 H provides global connectivity to remote devices and device/sensor networks via GSM GPRS cellular networks. It is ideal for tank monitoring, pipeline, agriculture, utility and other rugged applications. The ConnectPort X3 H is shipped iDigi ready and is available in limited quantities for \$438 MSR. It is certified by AT&T and works on virtually any GSM network around the world.

Digi ConnectPort X3 H Features

- Programmable, low-cost GPRS gateways
- Optional Nema 4X/IP66 enclosures with battery and solar power options
- iDigi Dia reduces development time by up to 90% using familiar Eclipse-based development environment
- Hosted iDigi management and monitoring platform provides secure, economical, scalable deployments
- Class 1, Division 2 certified
- Multiple power options including mains power, battery power or battery power with solar charger panel for harsh environments where power may not be available
- Sleep function which shuts down the device when it is not running to conserve battery power
- Available with an optional embedded XBee ZigBee module
- Optional analog I/O, digital I/O or RS-232 serial port for direct wired connectivity
- Optional internal GPS is also available for asset tracking
- Can be programmed using open-source Python or the iDigi Device Integration Application (iDigi Dia)
- Eclipse-based integrated development environment
