Digi: 3G cellular router with Wi-Fi, GPS and enterprise-class security

Digi International introduces the TransPort WR44, an all-in-one enterprise-class cellular router with integrated Wi-Fi access point. Digi TransPort WR44 is a multifunction router with flexibility for industry-specific device connectivity options. Various configurations are available including multiple serial ports, GPS or I/O telemetry modules, a USB port and a four-port Ethernet switch.

The TransPort WR44 can be used as a mobile hotspot in transportation applications such as in public safety vehicles, or on a bus, train, van or ship. It is also ideal for providing both primary and back-up connectivity to remote office networks. High-end security features also make the product perfect for point-of-sale applications such as remote payment processing within a Payment Card Industry Data Security Standards approved network.

The TransPort WR44 features diverse power options, multiple mounting options, a rugged design, local scripting, advanced dynamic routing, state-of-the-art security and firewall features including stateful packet inspection and integrated IPSec VPN. Enterprise-class protocols incorporate BGP, OSPF and VRRP+, a patented technology built upon the popular VRRP failover standard providing true auto sensing, auto failure and auto recovery of any line drop.
