Digi ConnectCore Wi-i.MX51 Digi JumpStart Kit Debuts

Digi International has unveiled the ConnectCore Wi-i.MX51 Digi JumpStart Kit featuring the ConnectCore Wi-i.MX51, a core module designed specifically for low power, wireless multimedia applications.

The kit includes all of the tools necessary to make wireless product development easy including development board, Windows Embedded CE 6.0 R3 board support package and a 7" WVGA LCD. The ConnectCore Wi-i.MX51 enables wired and 802.11n networking for low power embedded applications with demanding performance requirements such as medical devices, digital signage, transportation, security and surveillance, point-of-sale equipment

The ConnectCore Wi-i.MX51 is a 32-bit module featuring the high-performance Freescale i.MX515 ARM Cortex-A8 processor with 600 and 800 MHz processor speeds. It also features 10/100 MBit Ethernet networking and a pre-certified 802.11 a/b/g/n wireless interface.

ConnectCore Wi-i.MX51 early availability Digi JumpStart kits for Windows Embedded CE 6.0 R3 are available now for \$795. Embedded Linux support is also available.
