Digi International KK Joins the ARM Connected Community

Digi International KK, headquartered in Tokyo and specialising in device networking, has joined the ARM Connected Community.

The ARM Connected Community is a global network of companies aligned to provide a complete solution, from design to manufacture and end use, for products based on the ARM architecture. ARM offers a variety of resources to Community members, including promotional programs and peer-networking opportunities that enable a variety of ARM Partners to come together to provide end-to-end customer solutions. Visitors to the ARM Connected Community have the ability to contact members directly through the website.

Digi International develops devices and technologies to connect and securely manage local or remote electronic devices over a network or via the web. Digi provides NET+ARM processors, NET+ARM based modules, the development tools and software (Royalty-free NET+OS, Embedded Linux as well as Microsoft Windows Embedded CE 5.0 and 6.0).

Digi International K.K. is a Connected Community Partner
