Mouser Stocking Digi International XBee-PRO® ZB Programmable Modules

Program Directly to XBee Module via Built-in Processor

FOR IMMEDIATE RELEASE

PRLog (Press Release) - Aug 03, 2010 - Mansfield, Texas, USA - Mouser Electronics, Inc., known for its rapid introduction of the newest products, today announced it is stocking the Digi International XBee-PRO® ZB Programmable Modules.

Digi International XBee-PRO® ZB Programmable Modules make customizing ZigBee applications easy because a built-in processor enables the customization separate from the RF code. Programming directly on the Digi International XBee-PRO ZB Programmable Modules eliminates the need for a separate processor. Because the wireless software is isolated, applications can be developed using Digi International XBee-PRO Programmable Modules with no risk to RF performance or security. XBee-PRO ZB embedded RF modules provide cost-effective wireless connectivity to devices in ZigBee mesh networks. The XBee-PRO ZB Programmable Dev Kit (XBP24-BZTB-DK) makes it easy to develop designs using XBee-PRO ZB Programmable Modules. Learn more
