Wednesday, August 24, 2011

Digi International (NASDAQ: DGII) has introduced the iDigi Gateway Development Kit with 3G cellular connectivity. The kit demonstrates how remote devices can be connected wirelessly over cellular networks and integrated into a cloud environment with ease. It contains all of the hardware, software and documentation necessary for ZigBee-to-3G cellular Internet connectivity, iDigi Web services and Digi development tools. Features include:

- Designed to make it easy to setup a ZigBee network.
- Seamless connectivity to the iDigi Device Cloud for Web services integration to standard business applications over the Internet.
- Supports Sprint, Verizon, AT&T Wireless, Vodafone and other global 3G GSM networks.
- Includes the ConnectPort X4 ZigBee-to-3G cellular gateway, Digi XBee Smart Plug, battery-powered XBee temperature/light sensors, Digi ESP Integrated Development Environment (IDE) for iDigi Dia/Python development, and related cables, battery and power supply.
