**News Brief**

**Digi Buys MobiApps for Satellite Play (7/10/09)**

Digi International entered the market for satellite subscriber communicators for the Orbcomm network with its recent purchase of MobiApps Holdings Private. MobiApps is a developer of machine-to-machine (M2M) communications technology, focusing on Orbcomm satellite, cellular and hybrid satellite/cellular solutions.

The acquisition of MobiApps by Digi will result in satellite communicators suited to applications that cross country and continental boundaries, providing connectivity in remote locations and providing mission-critical wireless backup solutions when cellular coverage is insufficient.

Your comments are welcome, click [here](#).
