Digi Wireless Routers Supporting Electric-Vehicle Networks

in [News Departments](#) > [FYI](#)
 by [Renew Grid](#) on Wednesday 23 February 2011
 

Digi International says Better Place is using its Digi TransPort 6410 cellular router to connect electric-vehicle docking stations to the Better Place electric car network in Israel.

"Digi's high-speed cellular router provides the critical communication infrastructure between the docking station and our network, allowing for greater demand-management capabilities," says Greg Stein, vice president of Better Place.

Digi notes that its TransPort routers provide secure, high-speed wireless connectivity to remote sites and devices for primary or backup broadband networks.
