Digi International (NASDAQ: [DGII](#)) today introduced the ConnectCore 3G, the industry's first embedded module with integrated application processing and Qualcomm Gobi technology. Gobi technology supports High Speed Packet Access ([HSPA](#)) or Evolution-Data Optimized (EV-DO) networks, the two dominant standards for 3G data networks, from the same cellular radio. Ideal for developing remote device management solutions in energy, fleet management, digital signage, industrial automation, security/access control and other markets, customers can now develop one solution for use anywhere in the world with the same hardware. Combined with iDigi(TM) cloud computing services, the ConnectCore 3G allows customers to easily build scalable, secure and cost effective cellular solutions with global network connectivity.

"The ConnectCore 3G is perfect for device manufacturers that are tired of deciding between HSPA and EV-DO or doing two hardware developments to satisfy worldwide connectivity requirements," said Larry Kraft, senior vice president of global sales and marketing, Digi International. "And as a System-on-Module with robust application processing capability, it is an ideal core platform for OEMs to rapidly develop globally connected devices."

The ConnectCore 3G offers complete support for the iDigi platform, the embedded industry's first ready-to-use cloud computing platform for M2M network management. The iDigi platform enables secure remote access, control and management of network-connected devices and complete cloud-based application development. Featuring an easy-to-use development environment, the ConnectCore3G can be programmed using iDigi Device Integration Application (iDigi Dia) or open-source Python. It also includes a familiar Eclipse-based integrated development environment that allows Web developers to rapidly develop embedded applications.

The ConnectCore 3G is a member of the ConnectCore 9P 9215 ARM9-based Ethernet networking module family. Featuring cellular, Wi-Fi and wired versions, ConnectCore 9P 9215 modules are pin-compatible and interchangeable. ConnectCore 9P 9215 modules include two Flexible Interface Modules (FIMs) that allow customers to load and use application-specific interfaces such as Secure Digital, Controller Area Network ([CAN](#)), 1-Wire, additional UARTs and others. This allows users to custom configure the module for specific application needs. The modules also offer advanced networking protocols like IPv6, SNMPv3 and SSL.

ConnectCore 3G Digi JumpStart Kits(R) will be available in December 2010 for \$499. For more information, visit www.digi.com/ConnectCore3G. For more information about iDigi, visit www.idigi.com.

About Digi International

Digi International is making wireless M2M easy by developing reliable products and solutions to connect and securely manage local or remote electronic devices over the network or via the Web. Digi offers the highest levels of performance, flexibility and quality, and markets its products through a global network of distributors and resellers, systems integrators and original equipment manufacturers (OEMs). For more information, visit Digi's Web site at www.digi.com, or call 877-912-3444.

Brokerage Products and Services offered by Scottrade, Inc. - Member [FINRA](#) and [SIPC](#)

Online market and limit stock trades are just \$7 for stocks priced \$1 and above.

Any specific securities, or types of securities, used as examples are for demonstration purposes only. No information on this Web site should be considered a recommendation or None of the information provided should be considered a recommendation or solicitation to invest in, or liquidate, a particular security or type of security.

Investors should consider the investment objectives, risks, and charges and expenses of a mutual fund carefully before investing. A mutual fund's prospectus contains this and other information about the mutual fund. Prospectuses are available through our trading site or through a [Scottrade branch office](#). The prospectus should be read carefully before investing. No transaction fee (NTF) funds are subject to the terms and conditions of the NTF funds program. Scottrade is compensated by the funds participating in the NTF program through recordkeeping, shareholder, or SEC 12b-1 fees.

Investors should consider the investment objectives, charges, expense, and unique risk profile of an Exchange Traded Fund (ETF) carefully before investing. Leveraged and Inverse ETFs may not be suitable for long-term investors and may increase exposure to volatility through the use of leverage, short sales of securities, derivatives and other complex investment strategies. A prospectus contains this and other information about the ETF and should be obtained from the issuer. The prospectus should be read carefully before investing.

Margin trading involves interest charges and risks, including the potential to lose more than deposited, or the need to deposit additional collateral in a falling market. [Margin Disclosure Statement](#) (PDF) is available for download, or it is available at one of our [branch offices](#). It contains information on our lending policies, interest charges, and the risks associated with margin accounts.

Options involve risk and are not suitable for all investors. Detailed information on our policies and the risks associated with options can be found in the [Scottrade Options Application and Agreement](#), [Brokerage Account Agreement](#), and by downloading the [Characteristics and Risks of Standardized Options and Supplements \(PDF\)](#) from The Options Clearing Corporation, or by requesting a copy from your [local branch office](#). Supporting documentation for any claims will be supplied upon request.

Market volatility, volume, and system availability may impact account access and trade execution.
