Digi International has announced today the release of its Digi TransPort WR44 all-in-one cellular router that also sports an integrated Wi-Fi access point. According to the company, the new device delivers high-speed connectivity by combining a 3G cellular router, GPS, [Wi-Fi connectivity](#), as well as security, advanced routing, an Ethernet switch, and telemetry functionality.

"Industry-specific devices have special requirements that often cannot be satisfied with classic IT infrastructure," said Larry Kraft, senior vice president of global sales and marketing, Digi International. "The Digi Transport WR44 has all the functionality of enterprise-class routers but with a vertically focused feature set designed for specific industry applications

such as transportation, public safety, [remote office](#), retail and financial.”

According to [the company](#), the new Digi TransPort WR44 proves a great option for a [mobile](#) hotspot when it comes to transportation applications in a bus, train, van or ship. Moreover, it can also deliver both primary and back-up connectivity to office networks, and it also comes with security options that make it a great option for remote payment processing within a PCI-DSS approved network.

The company also states that the Digi TransPort WR44 comes with various power options and with multiple mounting possibilities, as well as with state-of-the-art security and firewall features (stateful packet inspection and integrated IPSec VPN) and with advanced dynamic routing. The [enterprise](#) class protocols that come with [the new device](#) include BGP, OSPF and VRRP+, and the router is also said to include auto sensing, auto failure and auto recovery features.

The multifunction [router](#) delivers flexibility and connectivity options that can be considered great for an industry-specific device, the company states. It comes with a wide range of serial ports (async or sync), with GPS or I/O telemetry modules, as well as with a USB port and a four-port Ethernet switch. Moreover, it also includes Digi's Remote Manager [software](#), which delivers easy setup, configuration and maintenance. More details on the device can be found [here](#).
