Digi Wireless: Spectrum Design Supports Freescale i.MX53 Processor

Mar 04, 2011 (Close-Up Media via COMTEX) -- Digi International announced that Spectrum Design Solutions, Digi's wireless design division, will offer custom design support for companies developing wireless products with Freescale Semiconductor's advanced i.MX53 application processor.

According to a release, Digi also offers a series of Systems-on-Modules based on the Freescale i.MX processor family including the ConnectCore Wi-i.MX51 and new ConnectCore Wi-i.MX53.

"Spectrum Design Solutions is a leading provider of custom design services," said Ken Obuszewski, director of product marketing

for Freescale's Multimedia Applications Division. "Digi has the hardware and Spectrum the design expertise to help OEMs quickly develop production-ready solutions using our i.MX53 processor." "We help customers eliminate the effort and risk of a complex design without sacrificing the important design flexibility aspects," said Rod Landers, vice president of business development, Spectrum Design Solutions. "We have a long relationship with Freescale and the expertise to help organizations quickly and easily add wireless
