Digi Finalizes Acquisition of MobiApps

Jul 14, 2009 (Close-Up Media via COMTEX) -- Orbcomm, a satellite data communications company focused on providing Machine to Machine (M2M) solutions, announced that Digi International has purchased MobiApps Holdings Private Limited (MobiApps).

[BT Global Services achieves 100 percent availability with business service management solution. Learn more, download free white paper.](#)

MobiApps is a developer of M2M communications technology, focusing on Orbcomm satellite, cellular and hybrid satellite/cellular solutions.

"We are very proud to welcome Digi as a manufacturer of Subscriber Communicators for the Orbcomm global M2M network," says Marc

Eisenberg, CEO of Orbcomm. "We continue to be impressed by the innovation that MobiApps brings to Subscriber Communicator design. Now, under the Digi umbrella, that technology can reach a larger market." "Our wireless M2M customers are increasingly asking for satellite as a communications option to complete their coverage model," said Joe Dunsmore, Chairman, President, and CEO of Digi. "We're looking forward to moving MobiApps products into Digi's global sales and distribution network. We believe that satellite M2M will be a high growth opportunity for the foreseeable future." Digi noted it will continue to produce the MobiApps M10, M100, M200 Subscriber Communicator models, as well as the custom designed and patented mixed signal application specific integrated circuit (ASIC), that it supplies to other module manufacturers.
