Digi's Spectrum Design Solutions division to offer custom design support

Mar 02, 2011 (Datamonitor via COMTEX) -- Digi International has announced that Spectrum Design Solutions, its wireless design division, will offer custom design support for companies developing wireless products with Freescale Semiconductor's advanced i.MX53 application processor.

Digi also offers a series of Systems-on-Modules based on the Freescale i.MX processor family including the ConnectCore Wi-i.MX51 and new ConnectCore Wi-i.MX53. From a custom baseboard development around the module to a full chip down design, Spectrum helps customers get new products to market using Freescale i.MX technology.

"We help customers eliminate the effort and risk of a complex design without sacrificing the important design flexibility aspects," said Rod Landers, vice president of business development, Spectrum Design Solutions. "We have a long relationship with Freescale and the expertise to help organizations quickly and easily add wireless capabilities to their products using Freescale technology." <http://www.datamonitor.com> Reproduction or redistribution, including by framing or similar means, is expressly prohibited without prior
