Digi International acquires Virginia-based MobiApps

July 10, 2009

HERNDON, VA - Digi International Inc. (Nasdaq:DGII) has acquired Herndon-based MobiApps Holdings, a developer of machine to machine (M2M) communications technology focused on the ORBCOMM satellite, cellular, and hybrid satellite/cellular communications.

Financial terms were not disclosed.

MobiApps had raised about \$18 million in venture capital backing from Intel Capital, Green Dot Capital, UOB Venture Management and 3i Group.

"Our wireless M2M customers are increasingly asking for satellite as a communications option to complete their coverage model," said Joe Dunsmore, Chairman, President, and CEO of Digi. "We're looking forward to moving MobiApps products into Digi's strong global sales and distribution network. We believe that satellite M2M will be a high growth opportunity for the foreseeable future."

Digi International is making wireless M2M easy by developing reliable products and solutions to connect and securely manage local or remote electronic devices over the network or via the Web.
