### **NetControl selects Digi Connect for NetCase**

NetControl picked Digi International to add telematics capabilities to NetCase, the company's on-board ticketing system with a touchscreen PC. Digi International will integrate its Digi Connect WAN 3G cellular router into NetCase. The router will connect NetCase to the NetControl servers via high-speed data connectivity over standard cellular networks and will facilitate on-board ticket sales, card payments using payment terminals, the collection of prepaid tickets and vouchers, and the validation of electronic tickets identified by a reservation code.
