

DIGI DEVICE CLOUDSM

Control raw machine data to unlock efficiencies that deliver real ROI

Digi Device Cloud is a cloud-based device management platform that allows you to connect any device to any application, anywhere.

Device Cloud gives you the tools you need to manage many devices quickly and effectively as well as insight into the health and current state of your entire device network.

CONTROL YOUR NETWORK

Take the headache out of managing large, complex device networks by leveraging 24x7 availability & device management tools.

CONNECT ANY DEVICE

Cloud Connector simplifies integration of any device into the cloud, giving you direct access to critical device data anytime, anywhere.

PROACTIVELY IDENTIFY ISSUES

Receive immediate notification when a device enters a particular state and take corrective action before an issue occurs.

LEVERAGE THE PLATFORM

Built for the cloud, leverage our multi-tenant platform and data centers around the world for a truly reliable foundation to your M2M deployment.

SECURE YOUR DATA

Know your data is secure and compliant with international data security legislation due to security policies based on ISO 27002, PCI, HIPAA, NERC CIP and CIS.

SCALE WITH CONFIDENCE

Whether you have one device or one million devices, confidently scale your network on our world class device connectivity platform.
