Digi Data Logger Data Recording Temperature Sensor

Digi Data Loggers provide critical visibility to temperature at the point of product while in transit. Attach to a pallet or tote to record product temperature every 10 minutes for up to 6 months. Data is stored and forwarded when the Digi Data Logger comes within range of a Digi Smart Gateway, or can be downloaded from the Digi SafeTemps mobile app. Use in conjunction with an on-vehicle Digi Smart Gateway for realtime product temperature reporting. Temperature data is collected, viewed and managed through the Digi SafeTemps dashboard and mobile app.

Features

- Greater than 6 months of data storage.
- Reports in real-time when in range of a Digi Smart Gateway or can be downloaded via mobile app.
- FAA regulation configurable.
- Includes high visibility orange lanyard attached to each sensor.
- Shipped active and ready to communicate.
- Easy-to-read system status LED indicators.
- NIST certified; enclosed in NSF grade plastic.

Includes high visibility lanyard for easy retrieval from shipments

Specifications

• Data Storage	>6 months based on 10-minute reporting interval
• Communication Range	300 feet line of sight*
• Communication Frequency	Configurable; default 10 minutes
• Communication Method	Bluetooth® 4.0
• Temperature Operating Range	-40°C to 100°C (-40°F to 212°F)
• Temperature Accuracy	±1°C (2°F)
• Battery Life	Minimum 12 months
• Battery Type	Lithium 3v CR2477
• Enclosure and Certifications	NSF food contact; NIST

* Actual communication distance will depend on RF environment
