

## SPECIFICATIONS 2017

### Digi Smart Dish Guard Wireless Thermometer

Digi Smart Dish Guard is a wireless and irreversible temperature measuring device for monitoring of commercial dish machines. Digi Smart Dish Guard also features a built in thermistor plate that replicates the surface temperature of dishes, pans, silverware, glasses, and other items that are run through any commercial dish machine.

### Features

- Monitors dish surface temperatures and sends them to Digi Smart Command for real-time compliance.
- Temperature logs are sent wirelessly, eliminating the need for manual logging.
- Eliminates manual testing of surfaces with costly and inaccurate test strips.
- On demand and scheduled reports provide management level oversight.

### Specifications

• Display	128x32 pixel graphical backlit LCD
• Temperature Range	-40°F to 221°F (-40°C to 105°C)
• Accuracy	±1.0°F (±0.5°C) at -4°F to 158°F (-20°C to 70°C)
• Resolution	0.1°F/C
• Backlight	Yes
• Fahrenheit/Celsius	Yes
• Sleep Mode	Yes
• Min/Max	Yes
• Hold	Yes
• Distance	5,000 feet line of sight*
• Batteries	3 AA
• Battery Life	12 months
• Calibration	NIST traceable Certificate
• Dimensions	5" x 0.75"
• Weight w/ Batteries	6.0 oz
• Water Protection Waterproof	Yes: IP66 waterproof
• Compliances	RoHS/FCC/IC

\* Actual communication distance will depend on RF environment
