Digi Smart Touch Cloud-Based Mobile Dashboard

Digi Smart Touch is a secure mobile website used to manage the temperatures collected from both equipment and flow-of-food, along with completed tasks and inspection results.

Features

- Can view all locations at one time.
- Can generate reports 24/7/365.
- Data search with custom date ranges.
- Calibration logs.
- CFR 21 compliant.
- Viewable task and inspection reports including custom comments and photos.
- Mobile dashboard allows users to see real time temperatures, completed tasks, and completed inspections anywhere internet is available.
