Digi Temperature Sensor Real-time Temperature Monitoring Sensor

Digi Temperature Sensors are easy to use and part of the complete Digi SafeTemps automated temperature monitoring solution. Temperature data is collected, viewed and managed through the Digi SafeTemps dashboard and mobile app. Digi Temperature Sensors have an operating range of -40°C to 100°C (-40°F to 212°F), with a communication range of 300 feet.

Features

- Shipped active and ready to communicate.
- NIST certified; enclosed in NSF grade plastic.
- Provides real-time documentation.
- Detects when equipment is operating.
- Provides roll door and swing door detection.
- Easy-to-read system status LED indicators.

Specifications

• Communication Range	300 feet line of sight*
• Communication Frequency	Configurable; default 10 minutes
• Communication Method	Bluetooth [®] 4.0
• Temperature Operating Range	-40°C to 100°C (-40°F to 212°F)
• Temperature Accuracy	±1°C (2°F)
• Battery Life	Minimum 12 months
• Battery Type	Lithium 3v CR2477
• Enclosure and Certifications	NSF food contact; NIST

* Actual communication distance will depend on RF environment
