DIGI CONNECTPORT X2

Customizable, low-cost Digi XBee® to Ethernet gateways offer easy IP networking of RF devices and sensor networks

ConnectPort® X2 is a small Digi XBee to Ethernet gateway that provides low-cost IP networking of RF devices and sensor networks. Featuring an easy development environment, ConnectPort X2 enables custom applications to run locally while interfacing across existing Ethernet networks for WAN connectivity to the internet.

ConnectPort X2 products feature an end-to-end development environment based on local customization via Python, allowing for rapid M2M-specific application development on the industry standard Python scripting engine. Digi ESP™

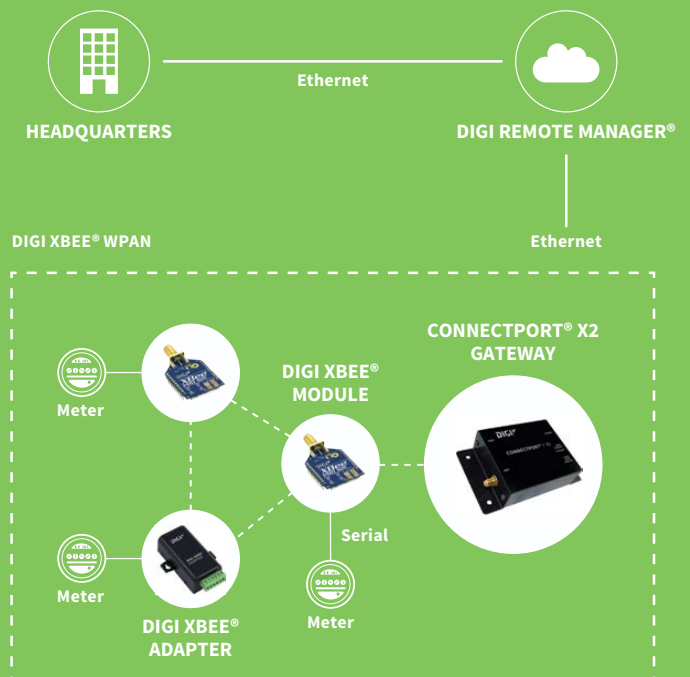

provides an IDE featuring device detection, debugging, compiling and downloading of Python code to Digi gateways.

Digi Remote Manager® provides a platform for the design, testing and deployment of M2M solutions. Using Digi Remote Manager, developers are able to seamlessly integrate remote devices and device data into business applications and processes.

BENEFITS

- Digi XBee to Ethernet IP gateways support numerous Digi XBee protocols
- Industrial grade enclosures for rugged environments
- Digi Remote Manager for secure, scalable access to an unlimited number of remote assets and seamless web services integration from Digi gateways into customer back office applications
