More and more, electronic devices used in all types of commercial applications are being network-enabled so that data from those devices can be accessed, evaluated and utilized in real time. The Digi Connect SP device server is a simple and cost-effective solution for migrating electronic devices to this emerging world of networked device collaboration.

Built on Digi’s 32-bit NET+ARM technology, the Digi Connect SP provides a powerful off-the-shelf hardware platform for standard plug and play device networking as well as custom network applications. The award-winning NET+ARM architecture provides a seamless migration path to embedded modules and a fully-integrated system-on-a-chip solution.

The Digi Connect SP also provides an easy user interface, product customization options, intelligent remote management and monitoring capabilities through Digi Remote Manager®, full IPv6 support and standard management interfaces including SNMP.
CUSTOMIZABLE FIRMWARE MODELS

The Digi Connect SP device server is the ideal platform for custom web- and network-enabled applications. It eliminates the hardware design effort and delivers a true device networking solution that is powerful enough to meet your future performance requirements.

Based on Digi’s NET+OS® development platform, it delivers the integrated building blocks and tools to quickly and cost effectively create flexible and secure embedded applications for integrated, high-performance web and networking solutions.

STANDARD FIRMWARE MODELS

The Digi Connect SP delivers a true plug-and-play device networking solution that combines a compact form factor with proven serial port connectivity. Compared to the similarly-sized Digi One® SP, the Digi Connect SP provides a more extended operating temperature range, IPv6 support, the ability to issue automated email alerts and SNMP traps, and unique product customization capabilities. These and other features make the Digi Connect SP an attractive solution for a broad range of applications in retail/POS, manufacturing, building security, government and medical.
