

Ramping up Your Work-from-Home Infrastructure

Scalable, Remote Connectivity Solutions

Employee health and safety come first. But until the threat of the coronavirus (COVID-19) is under control, businesses need to carry on. For many organizations, that means employees working remotely for the foreseeable future. Yet home Wi-Fi can present risks to proprietary data and confidential internal communications.

Fortunately, it is possible to provide commercial-level security at an affordable cost—with connectivity solutions from Digi. Digi's cellular extenders deliver secure connectivity in a compact, all-in-one solution at low cost and integrate seamlessly with your existing infrastructure.

Keep track of all your vital connections with one central management platform, Digi Remote Manager. With Digi Remote Manager, your IT team has complete control and is able to easily and securely monitor and configure devices remotely. And all of these solutions enable you to offer flexible work arrangements long into the future.

No one knows when the crisis will pass. But until it does, you can help your organization keep as close as possible to “business as usual” with scalable, remote connectivity solutions from Digi.

Featured Products

Digi® 6310-DX

Digi 6310-DX is a scalable failover solution that lets you avoid network disruptions and outages with primary or backup LTE connectivity.

Digi® EX15

The Digi EX15 cellular extender ensures next level connection and security with gigabit Ethernet and Wi-Fi options.

Digi Remote Manager®

Cloud-based Digi Remote Manager provides centralized control, security and management for your IT Team. Monitor and configure your devices remotely.
