Quick Start Guide
TransPort® WR11
EVDO Models

Welcome to your Digi product
Get started: This guide helps you with initial product setup. Need more? Find additional product support at www.digi.com/support/TransPortWR11. Or connect to the online documentation by scanning this code:

Digi Technical Support: Digi offers multiple support plans to help you get the most out of your product. For information on Technical Support plans and pricing, contact us at 877.912.3444 or visit www.digi.com/support.

Documentation feedback: To provide feedback on this documentation, send an email to techcomm@digi.com.

1 Verify your components
   Included equipment
   Required additional equipment

   Verify that you have all included equipment. If any item is missing or damaged, contact your supplier.

2 Connect the hardware
   1. Connect the cellular antenna to the antenna connector.

   2. Connect the plug end of the 5-volt power supply to the power connector on the unit, and plug the other end into a wall outlet. Insert the power supply end fully and rotate clockwise to engage and lock.

   3. Connect one end of the Ethernet cable to the Ethernet port on the unit and the other end to an Ethernet port on a PC.

Note: Position the Digi TransPort WR11 on a flat, level surface in a location with adequate ventilation. The unit is designed for indoor use. Do not expose the unit to extreme heat or cold, strong magnetic fields, or liquids.

3 Run the Getting Started Wizard

To use your Digi TransPort WR11, you must first activate the device with your carrier (Verizon or Sprint). This process involves supplying the carrier with the MEID number from your device, which is printed on the label on the bottom of the router.

If your PC is configured to automatically get an IP address, it can obtain the IP address from the TransPort WR11. Otherwise, make sure your PC can connect to the network 192.168.1.0 (255.255.255.0).

1. Enter 192.168.1.1 into the address bar of the web browser.
2. The first page of the Getting Started Wizard appears. The wizard guides you through initial configuration of your TransPort device.
   - To run the wizard, click Get Started.
   - To manually configure the TransPort device, click Skip Wizard.

   Note: The default username and password to log in to the TransPort device are username and password.

4 View the TransPort LEDs and startup states

- **SERVICE LED:** Indicates the presence and level of cellular service running on the device.
  - Off: No cellular service
  - Amber: No connection established
  - 1 blink: Device is running 1xRTT service
  - 2 blinks: Device is running EVDO Rev 0 service
  - 3 blinks: Device is running EVDO Rev A service

- **SIGNAL LED:** Indicates the strength of the cellular signal.
  - Off: Poor or no signal. Place the device in a location where it gets a better signal.
  - Amber: Fair
  - Green: Good

- **POWER LED**
  - Off: No power
  - Green: TransPort device is powered

5 Next steps

After the Getting Started Wizard completes, the TransPort web interface appears. For additional configuration, use the web interface and refer to the Digi TransPort User Guide and Application Notes on the Digi Transport WR11 Product Detail page at www.digi.com/support/TransPortWR11.
